Best in Show and Best Intermediate

RUBIS

Res Ch Bitch & Best Aust. Bred

Reserve Challenge Dog

Best Minor

Best Junior

Best Open

Best Neuter

Judges Critique.

Firstly I would like to thank the Scottish Terrier club for the invitation to Judge at your last show 09th October 2016. It has been many years since I have judged at the Scotty club show. In all those years, I have had the pleasure of watching many Scotties coming through & winning major awards along the way. PS Can't forget the Club catering of the lunch either.

Congratulations to all my winners & wish you all the best for the future.

Overall, I found the Scotties to be of thick-set and ready to go to ground if required.

Heads long with punishing jaws, planes parallel and of equal length. Dark eyes well set under their eyebrows. The odd sets of ears were large but on the whole they were correct. Mouth no problems. Necks again were muscular and of the moderate length required. Coats – lovely, harsh and double.

Personally where I can see improvements would be in the forequarters and body. Not all Scotties had the required slung forechest i.e. they were up on leg and this followed through to the hindquarters i.e. straighter in stifle giving the appearance of roached topline. In addition I would like to see more 2nd thigh. We can't forget that a Scotty must have big, wide buttocks.

So the body, the Scotty should be proportionately short backed & this comes from the ribs extending well back not from a longer loin. I felt some of the Scotties were becoming too long in body therefore losing strength and substance. However by looking and thinking about your breeding this can be overcome.

Once again, thank you for the opportunity

Regards

Rebecca Preece-Harvey
