Some Christmas Cheer

The Scottish terrier Christmas Party was a great success and it was fabulous to see so many pet people. On cleaning up at the end I collected the left over food and contacted Hawkesbury Helping Hands. It is an organisation that was started by an 8 year old and her mother after the 8 year old saw a hungry man rummaging for food through their family bin.

For over 10 years Hawkesbury Helping Hands has supported those experiencing homelessness or at risk of homelessness. They provide love, care, food, toiletries, clothing, tents and blankets, pet supplies. Free meals are served 3 times a week. They now collect formal wear so no child feels they can not attend their graduation or formal. This year they started distributing school backpacks full of school supplies.

I arrived to find they had over 60 people to feed that night and when I showed what I had the woman's eyes watered. I explained where the food had come from and she was extremely grateful and could not stop thanking me. So I am passing on their gratitude and thanks. I like to think we made someone very happy.

HOW TO WALK A HUMAN A Dogs Guide

Humans need exercise. If they don't get it they become "chubby". It's up to you to save them.

- 1. Allow your human to tether themselves to you. This keeps them from wondering off or running away.
- Your human will probably need breaks. Be considerate and stop and sniff often.
- 3. Bark frequently, Humans have short attention spans.
- When you go to the bathroom, walk away. If you have trained your human correctly, they will pick it up. Good aerobics.
 - Periodically drag your human as fast as you can. This is called interval training.

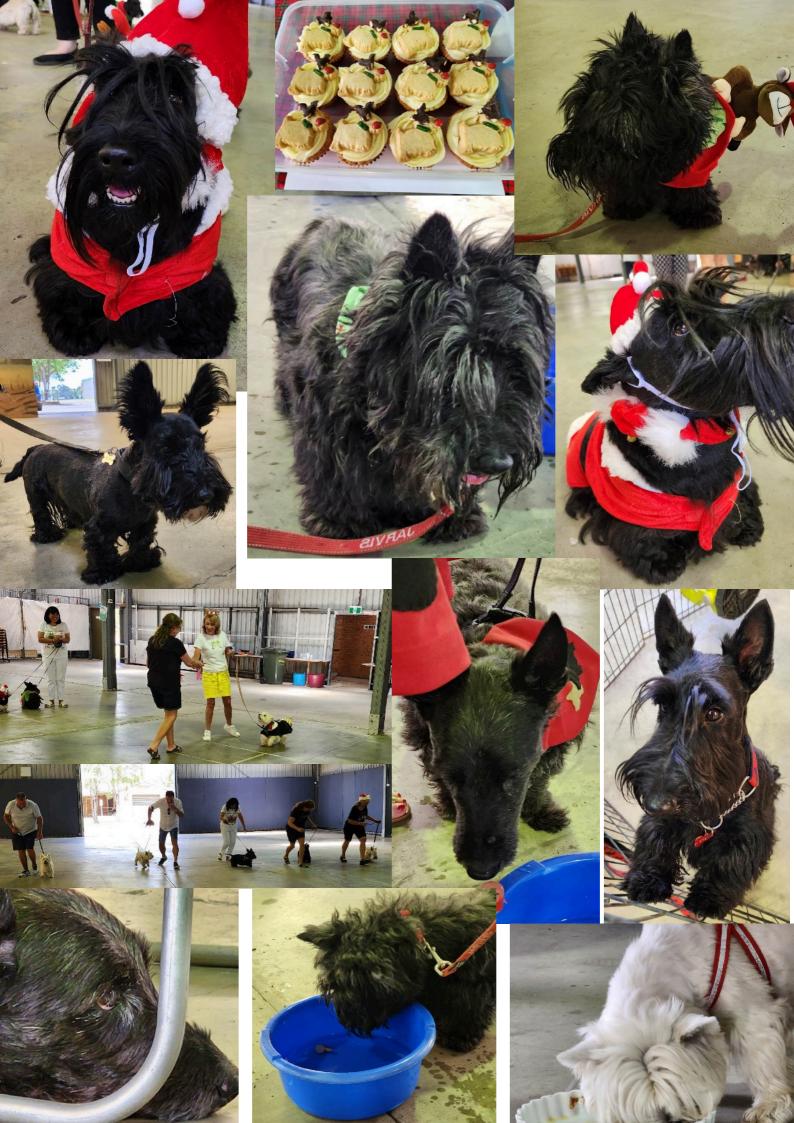

7. Once you return home, allow your human to remove their tether, then lick their face many times. This is positive reinforcement for a job well done.
